EDUCATION

CALVIN UNIVERSITY | GRAND RAPIDS, MI
Bachelor of Computer Science
GPA 3.6

Anticipated: May 2026

EXPERIENCE

HEKMAN LIBRARY | GRAND RAPIDS, MI
Technology Assistant

Aug 2025 - Present

- Built a self-checkout kiosk application using React Native for the library; iterated on features based on user testing and continuously improved UX/UI across the application.
- Developed a real-time room availability and reservation system for 36 study rooms, integrating LibCal's API to parse and manipulate JSON data; implemented the interface using HTML, CSS, JavaScript, and jQuery, and deployed the endpoint on the library's nginx server.
- Implemented the Hekman Library search results page using Angular, consuming APIs that accept user-defined filters and return clean, user-friendly search results within the Alma Primo system.
- Solved integration challenges between modern frameworks and legacy systems, applying creative and maintainable solutions to support long-standing library technologies.

CALVIN UNIVERSITY | GRAND RAPIDS, MI
Data Internship

May 2024 - Present

- Developing Power BI reports using Handshake API endpoints for student data to create real-time reports and move away from static data downloads.
- Using Power BI, Power Query, Tableau, Salesforce, Workday, Excel and Python for Data Analysis and visualization
- Making and developing the Career Center Website to include/ embed reports, statistics, and information
- Working with a team and other departments to make a consistent and accurate data structure across all platforms and departments

ADAC AUTOMOTIVE | GRAND RAPIDS, MI
Data Internship

May 2025 - Aug 2025

- Built and optimized SQL reports for finance cost validation, improving accuracy and efficiency of cost-tracking processes
- Supported Manufacturing Execution Systems (MES) by developing Ignition application modules for asset and line management, enhancing production visibility
- Consolidated and mapped 290+ vendor applications to support ERP transition planning, improving cost-effectiveness and system visibility
- Gained hands-on experience across Power BI, cybersecurity, networking, ADP integration, and automation through shadowing and cross-functional collaboration
- Partnered with technical mentors and leadership to deliver projects that aligned with business needs while expanding technical skills in data engineering, software development, and analytics

CALVIN UNIVERSITY | GRAND RAPIDS, MI
Resident Assistant

Aug 2023 - May 2024

- Assisting the transition into college/university life
- Developing relations among 40 residents
- Counseling and advising residents with their problems, questions, or concerns.
- Enforcing university and residence hall rules and regulations
- Planning weekly social events for 36 residents
- Managed administrative duties: budgeting, maintenance, incident reports, resolving conflicts

PROJECTS

First Destination Report

- Using PowerBI, Power Query, SQL, and Data analysis to create the Calvin University First Destination Report as required by the government for all Universities
- Used Python Pandas library to clean, fix and run data analysis.
- Creating new datasets for future use on Student information by joining pre-existing tables

Hekman Library Website: <https://library.calvin.edu/home>

- Updating and adding features to the website for better UX and UI
- Adding features such as search bar filters for the entire catalog of Hekman Library
- Developing a system for making reservations for 36 study room locations and a display to show their availability on displays across the library
